INTRODUCTION

Mississippi's fertile fields produce more than crops; they produce economic potential. Yet, much of this potential slips away. Every dollar that leaves Mississippi's agricultural and forestry sectors represents lost economic growth opportunities for the state. While agricultural and forestry products are pillars of Mississippi's strong economy, a significant portion of their monetary value leaks. Economic leakage occurs when spending on goods and services flows outside the state rather than supporting local businesses and employment in Mississippi. For example, if a Mississippi farm spends \$1 million on input supplies, but \$800,000 goes to out-of-state vendors, 80% of that money leaks to other states, diminishing local economic growth.

Economic leakage in the agricultural and forestry sectors has several significant implications for a state's economy. When a large portion of spending leaves a state, it limits the potential for in-state local economic growth by reducing the multiplier effect — fewer dollars circulating within the economy, resulting in fewer jobs, lower wages, and less business expansion. High leakage also leads to missed employment opportunities, as local businesses and industries fail to benefit from the potential demand for goods and services. This weakens in-state supply chains, making the state's economy more dependent on external input markets in other states and more vulnerable to out-of-state supply chain disruptions.

Additionally, economic leakage decreases local and state tax revenue, limiting public infrastructure, education, and healthcare funding. It also results in missed opportunities for value-added manufacturing, such as locally processing raw materials like crops or timber, which could generate higher profits and more skilled jobs. Over time, high leakage increases economic vulnerability, exposing a region to volatile market fluctuations and supply chain disruptions. These combined factors stunt community development and reduce the overall quality of life, making it harder for an area to grow sustainably and

remain resilient during economic downturns and supply chain disruptions.

Addressing economic leakage by promoting in-state sourcing of inputs, developing value-added industries, and improving infrastructure can help retain more economic activity within a region, fostering long-term growth, job creation, and community resilience. However, to understand the economic growth opportunities, the first step is to estimate the economic leakage in the agricultural and forestry sectors to unearth growth opportunities for expansion into more value-added processing and other agribusiness opportunities to prosper Mississippi's economy.

To understand economic leakage and future growth possibilities, this study delves into the extent of economic leakage in Mississippi's agricultural and forestry sectors and explores pathways to mitigate it by addressing three critical questions:

1. What is Mississippi's economic leakage resulting from out-of-state input purchasing?
2. What is the volume of leakages across the agricultural and forestry sectors?
3. What impact could retaining 25%, 50%, or 75% of this leakage have on Mississippi's economy?

By understanding and addressing economic leakage, Mississippi can strengthen its agricultural backbone, create jobs, and foster long-term prosperity. This study employs Input-Output (I-O) models to estimate economic leakage and quantify its effects on wages, employment, industry sales, and value-added contributions. The findings will provide local and state economic development agencies with actionable insights to identify underdeveloped sectors and maximize local impact, unlocking the state's full financial potential. This study offers the insights needed to unlock that potential.

INPUT-OUTPUT MODELS AND ECONOMIC LEAKAGE

I-O models examine inter-industry relationships within a defined economy by examining “backward linkages” that represent inputs or purchases an industry requires to produce its product or output. Two general approaches examine an industry’s contribution or impact on a defined economy.

The first is called the economic impact analysis of an existing regional economy, whereby the net changes in new economic activity related to an industry, event, or policy are estimated. Example analyses include considering the opening or closing of a new agribusiness enterprise or a change in production of an existing agribusiness company or sector. These positive or negative changes can be regarded as “shocks” to an existing regional economy. Using I-O models, these economic impacts of net changes in new economic activity can be estimated to understand how employment, industry output, or sales either increase or decrease related to shocks to the regional economy.

The second analysis, called economic contribution analysis, estimates the gross change in economic activity associated with an industry, event, or policy in an existing regional economy. An analyst can use I-O models to examine an industry’s contributions to a regional economy. For example, Henderson et al. examined the economic contribution of the agricultural and forestry sectors on Mississippi’s economy in 2022. They found these sectors directly supported 120,159 jobs with \$6 billion in wages, \$33.42 billion in sales, and \$9.34 billion in value-added production.

When including indirect impacts from spending within other industries, the total economic contribution increased to 185,774 jobs with \$9.2 billion in wages; and \$46.17 billion in sales and \$15.43 billion in value-added.

These figures highlight the significant economic benefits of the agricultural and forestry sectors on Mississippi’s economy. However, these results did not include any “shocks” to the economy, such as opening a new oilseed processing company. The focus on economic contribution analysis is simply on the level of contribution the existing agricultural and forestry

sectors currently contribute to the state’s economy.

The Need for a New Approach

While Henderson et al. examined the agricultural and forestry sectors’ economic contribution to Mississippi’s economy, those results did not show how those impacts flow out of Mississippi to benefit other U.S. states. However, this study fills in this gap by extending the scope to investigate the contribution to industries outside Mississippi, including the rest of the U.S. This study also examines the value of the Mississippi food and fiber industry’s associated production purchases outside Mississippi or economic leakage. We build upon a consistent set of I-O models research applying I-O models to investigate how supply chains for agriculture and forestry can be underperforming, resulting in economic losses to agriculture and forestry-dependent communities.

Current agricultural and forestry economics literature needs to be more cohesive, underscoring the need for a new research approach to develop strategic efforts to invest in underperforming or failing sectors. The predominant research approach has been to analyze the economic impact of an agricultural, forestry-related, or non-agricultural business if it enters or exits a county, an intra-county region, an inter-county region, or multiple-state region.

Other studies examine a county, region, or state’s agricultural and forestry sectors’ economic contribution to the target area’s economy. However, the problem with these analyses is that agricultural and forestry-related sectors in a state are connected to other state economies across the U.S. Focusing within a state or a multi-state region misses much of the nature of economic opportunities for agribusiness growth, especially from a rural development perspective. Only a national study showing the connectedness of agricultural and forestry-related agribusinesses across all 50 states can unearth an understanding of how these sectors could grow with policy changes toward expanding new agribusiness investments. Few studies have explored the interconnectedness of agricultural and forestry industries across the U.S. from this perspective.

The disjointed nature of agricultural and forestry economics literature highlights a critical gap in understanding how these sectors function across state lines and how their interconnectedness can be leveraged to strengthen rural economies. The predominant focus of most research has been localized or regional. Studies often look at the economic impacts of agriculture- or forestry-related businesses within a county, an intra-county region, or a multi-state region. These approaches provide valuable insights into the economic contributions of agriculture and forestry sectors to specific areas. Still, they need to capture the full scope of opportunities at a national level, particularly in how these sectors interact across states.

The New Approach

One of the significant limitations of existing research is the narrow geographic lens, which needs to include the broader economic dynamics at play. The agricultural and forestry sectors in one state operate in collaboration. These industries are part of an intricate network of supply chains, labor markets, and consumer demand that cross state borders. When researchers focus solely on the economic contribution of these sectors within a limited region, they overlook the growth potential that comes from understanding how one state's agriculture and forestry activities influence and are influenced by those in other states.

For instance, a study that examines only the economic impact of a new agribusiness in a single county might need to include how that business could benefit from supply chain opportunities in neighboring states. This type of research needs to account for how businesses in one state might depend on goods and services from another. By failing to address cross-state interactions, previous research has missed

opportunities to fully understand and promote agribusiness growth, especially in rural areas. However, this can be investigated using Multi-Regional Input-Output (MRIO) analysis, which utilizes interregional commodity trade flows to quantify demand changes across regions in response to a change in production in another region.

In this paper, we provide the first known estimates of the value of input purchases made by Mississippi's agricultural and forestry sectors from other states and regions (Fig. 1). These out-of-state input purchases result in indirect and induced economic impacts that benefit the source states—impacts that represent lost opportunities for Mississippi's economy had those purchases occurred in-state. This research establishes a baseline understanding of these leakages for Mississippi, creating new insights into where and how economic value is leaving the state and the value of retaining leakage.

The objectives of this research are to:

- Quantify, for the first time, the magnitude of input-purchasing leakages from Mississippi to other states.
- Assess the economic impact of leakages on Mississippi's economy.
- Evaluate “what-if” scenarios that model the potential economic gains from reducing these leakages; and
- Propose actionable next steps to identify economic growth opportunities for Mississippi's agricultural and forestry supply chains to encourage economic growth in Mississippi's agriculture and forestry sectors.

METHODS

The economic contribution I-O model in Henderson et al. for estimating Mississippi's agricultural and forestry industries' economic contribution to the state's economy can be extended to investigate how other U.S. state economies benefit from MRIO analysis. MRIO utilizes interregional commodity trade flows to quantify demand changes across regions in response to a shift in production in another region. As a result, the leakage resulting from Mississippi's agricultural and forestry industries can also be estimated.

Software used for this analysis is a well-known input-output modeling system called Impact Analysis for Planning (IMPLAN), which is updated annually by the IMPLAN Group LLC. IMPLAN is a computerized database and modeling system for constructing regional economic accounts and regional input-output tables. The IMPLAN 546 sector input-output model is based primarily on data from the U.S. Bureau

of Economic Analysis, U.S. Bureau of Labor Statistics, U.S. Census Bureau, U.S. Department of Agriculture, and U.S. Geological Survey. This study used an input-output model constructed with IMPLAN software and the most recent 2022 IMPLAN data. Each of the 546 IMPLAN sectors corresponds to one or more of the 2022 North American Industry Classification System (NAICS) 6-digit sectors (Table A.1).

To conduct an MRIO analysis of agricultural and forestry production and processing, the first step is to define the contributing region as all counties in Mississippi and their respective economic sectors of interest, including agricultural and forestry production and processing. Following IMPLAN (2022), a MRIO analysis works ideally with up to ten regions. The remaining regions are based on states aggregated according to the USDA/NASS Agricultural Resource Management Survey (ARMS) (Figure 1).

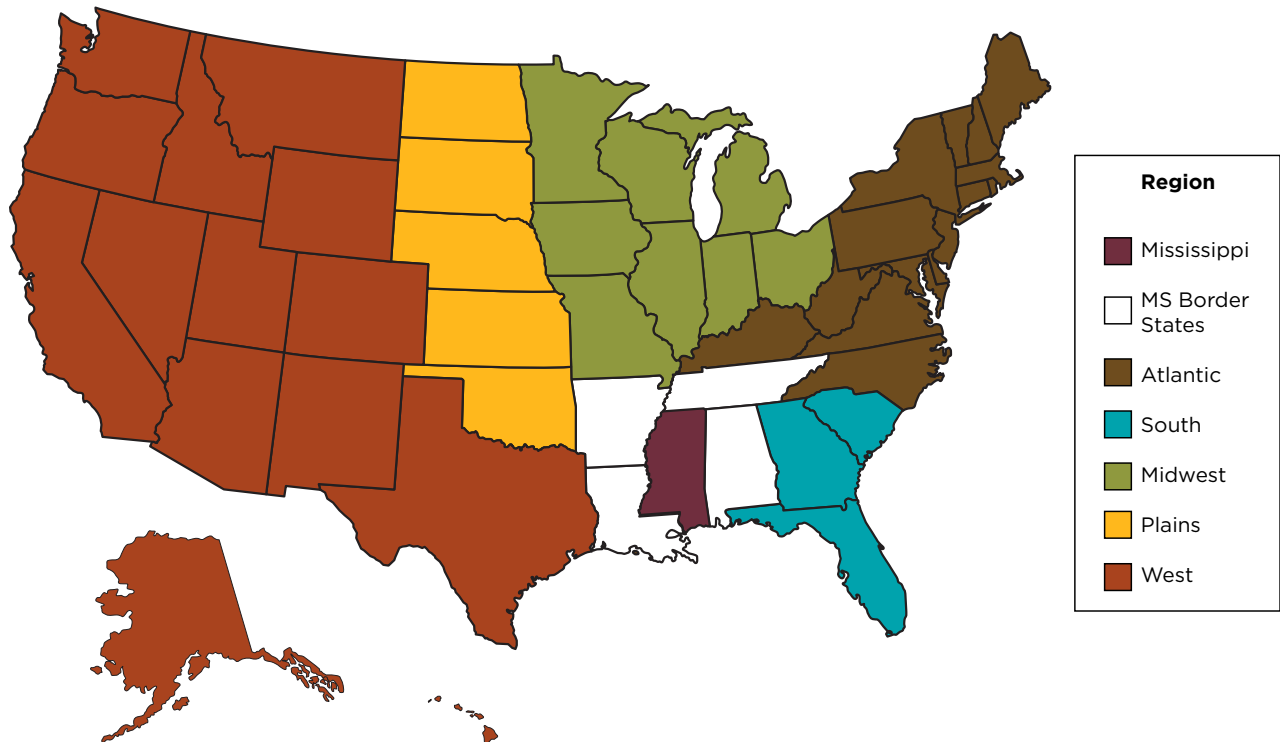

Figure 1. Multi-Regional Input-Output (MRIO) Regions in the United States.

For reporting purposes, MRIO results will be aggregated from 546 sectors into 31 aggregated sectors—13 agriculture and forestry sectors and 18 sectors representing the rest of the economy (Table A.2). These 13 aggregated agriculture and forestry sectors are comprised of 91 individual IMPLAN sectors. To avoid aggregation bias, each of the 91 sectors were analyzed aggregated using contribution “extraction” analysis with the diagonal element “own effects” controlled. The output value for each of the 91 sectors was used as the event value in IMPLAN, and for some sectors original primary data sources were used in place of IMPLAN’ study area data.

Estimating Economic Leakage using MRIO

The MRIO results will show how much wages and salaries, employment, output, and value-added in Mississippi and the other nine regions of the U.S. benefit from Mississippi’s food and fiber production and processing system. The MIRO analysis will calculate the economic contribution to the entire U.S., which will be reported for the ten previously defined regions of the MRIO model. This leads to estimates of agricultural and forestry sector leakage to state economies from Mississippi’s agricultural and forestry production and processing systems.

Also, an MRIO model reports the direct effect for Mississippi, associated indirect and induced effects, and all other regions. Only indirect and induced effects are reported for the other nine defined regions. Direct effects represent the economic activity of businesses belonging to agriculture and forestry in Mississippi. Indirect effects represent the economic activity of companies that supply goods and services for agricultural enterprises needed in production. Induced effects reflect household spending in the form of wages and salaries earned by employees of direct and indirect impacted businesses. The results of the MRIO contribution analysis will be presented for each state/region, and the total effect contribution values by the aggregated sectors (rows) for wages and salaries, employment, output, and value-added will be reported (columns).

The IMPLAN Approach

The procedure to use IMPLAN data to calculate an estimate of the “initial” indirect effect or leakage

value requires elements of IMPLAN’s sector-specific estimates for trade flows and the absorption coefficients for the production function for each sector, which are reported in IMPLAN’s commodity demand tables and trade flows tables. The calculation to approximate the first round of indirect effects from an event in Mississippi to another region requires IMPLAN data in the commodity demand table and the commodity trade flows data library. The commodity demand table, specific to each IMPLAN sector, provides the gross absorption values by commodity, reflecting the Leontief production function and showing all commodities used in the sectors’ production.

The trade flow tables indicate the estimated amount that any given economy sector in Mississippi is purchasing from other regions. The calculation for the initial indirect effect uses Mississippi sector-specific direct effect production value (output value), which is multiplied by each gross absorption coefficient. This produces a corresponding column indicating the proportion of the production value used to purchase other commodities to produce its output value. Next, percentages are calculated from the trade flow tables for all 50 states for each commodity of interest across the agricultural and forestry production and processing sectors destined for Mississippi. This is sourced from any of the 50 U.S. states. The resulting trade flow percentages are applied to gross absorption values to calculate the estimated “initial” indirect effect. This “initial” indirect represents the leakage resulting from out of state purchases of intermediate inputs by the Mississippi agriculture and forestry sectors.

To better understand how retaining leakages and the resulting economic impact of agriculture and forestry to the Mississippi economy, these intermediate input purchases can be modeled as direct purchases from corresponding sectors within Mississippi. The intermediate input purchase leakage values are specific to each of the 91 IMPLAN agricultural and forestry production and processing sectors and lists each input purchase by commodity sector ranging from sectors 3001 to 3538 which corresponds to the 538 IMPLAN industry sectors. These purchase values were summed for all 3001 to 3538 sectors and modeled as using impact analysis with the diagonal element “own effects” controlled.

RESULTS

The MRIO analysis of the economic contribution of Mississippi's agricultural and forestry production and processing industries are reported in Table 1 for Mississippi, the nine regions representing the other 49 states, and the U.S. in total. The total contribution to Mississippi alone is 185,458 jobs, \$9.20 billion in wages and salaries, \$15.44 billion in value added, and \$46.15 billion in total output.

Since many of the input purchases made by Mississippi's agricultural and forestry production and processing industries occur outside of Mississippi, an economic contribution occurs to the other nine defined regions as reported in Table 1 that result in a U.S. total economic contribution amounting to 286,535 jobs, \$16.26 billion in wages and salaries, \$28.26 billion in value added, and \$75.57 billion in total output. Each of the nine defined regions benefits from Mississippi's out-of-state purchasing. This out-of-state purchasing by the various sectors that comprise Mississippi's agricultural and forestry production and processing industries can be examined in greater detail to better understand the origins of these purchases by the 13 aggregated industries.

Table 2 reports total input purchases by sector and region in absolute dollar amounts, while Table 3 expresses these values in percentage. All input purchases that occur outside of Mississippi are leakages to Mississippi's economy, resulting in economic benefits accruing to other states and generating an economic contribution as reported in Table 1. The values reported in Table 2 represent that portion of output values or production values that are spent by the sector toward the purchase of inputs as calculated using IMPLAN's Leontief Production Function Gross Absorption Coefficients.

For example, Mississippi's output value for soybean farms in 2022 was \$1,783,664,114 with \$746,672,634 allocated to the purchase of inputs, with the remainder representing value added for labor and proprietary income and taxes (Table 2). However, of that input purchase amount, 62.46% or \$466,387,356 of input

purchases occurred in Mississippi (Table 3) with the remainder of purchasing from outside of Mississippi representing a leakage.

The corresponding input purchase values for each of the 13 agricultural and forestry production and processing sectors are reported in Table 2, which also reports the amount of input purchases that are occurring in each of the defined regions. In absolute terms, the food and fiber products sectors have the largest in-state purchase of inputs at nearly \$4 billion with also the largest out-of-state purchases at \$747.8 billion accruing to the Atlantic region. The specific sectors where these purchases were made are shown in the Appendix A.3 tables.

In percentage terms, aquaculture and other animal production had the largest in-state input purchases at 94.5%, while agriculture and forestry support activities sector has the largest out-of-state input purchases at 35.76% accruing to the western region. These results are demonstrated in Figures 2A and 2B and shown in percentage terms in Table 3. Further, the 91 IMPLAN sectors of the 546 identified as agricultural and forestry production and processing are aggregated, for simplicity of reporting, into 13 agricultural and forestry production and processing sectors.

However, to provide more insight as to where leakages are occurring outside of Mississippi, the unaggregated results on input purchasing by the 91 IMPLAN agricultural and forestry production and processing sectors are reported for the top 10 largest commodity purchases for each (See Appendices A.3.). Each of the agriculture and forestry sectors' input purchases in-state and out-of-state are shown in these appendix tables. Table 4 reports the summation for the top 30 intermediate input purchases summed across all of Mississippi's 91 IMPLAN agricultural and forestry production and processing sectors. These values demonstrate the largest 30 intermediate inputs purchased outside of Mississippi by the agricultural and forestry production and processing sectors.

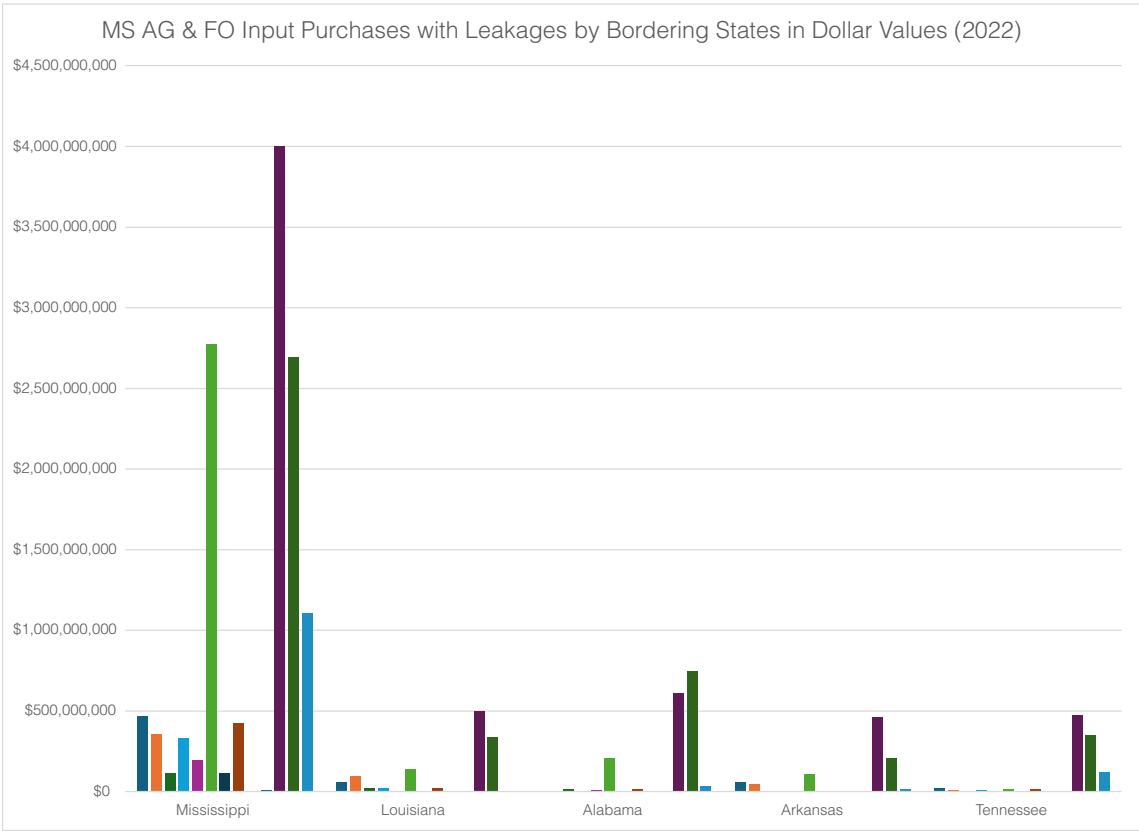

Figure 2A. Input purchases in 2022 dollars for MS agriculture and forestry with leakage values by border states.

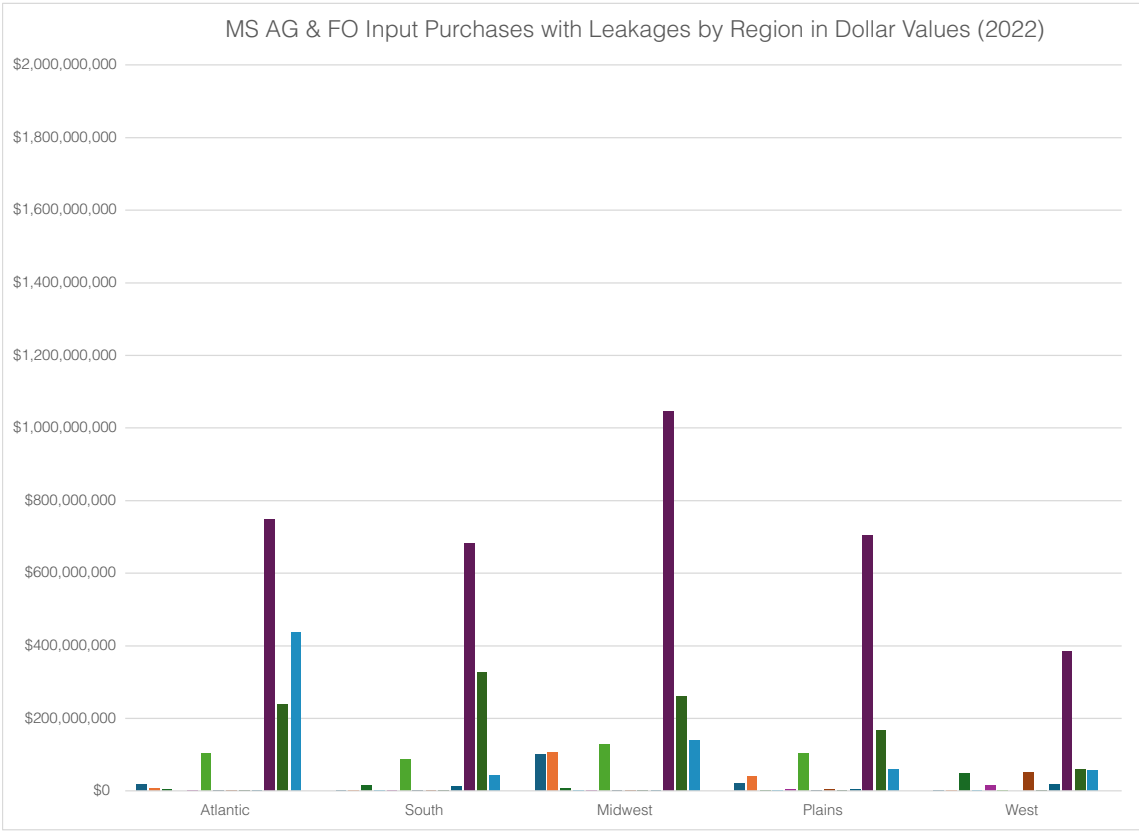

Figure 2B. Input purchases in 2022 dollars for MS agriculture and forestry with leakage values by regions.

Table 5 demonstrates the amount of input purchasing leakage by Mississippi's agricultural and forestry production and processing industries. The MS Direct Effect (DE) is the value of production for the aggregated industries. Keeping with the Soybean farms example, the value of production in 2022 was \$1.78 billion. The IMPLAN estimated Gross Absorption Coefficients (GAC) based input purchases comprises \$746.7 million with the difference representing value added of \$1.04 billion. Of the \$746.7 million in input purchases, only 62.46% or \$466.3 million of input

purchases occur in Mississippi with the remainder purchased from outside of Mississippi amounting to \$280.3 million or a leakage of 37.5%. That same calculation is presented for the other aggregated industries.

The leakages are largest in percentage and absolute terms more so for secondary agricultural and forestry processing industries, for example, food and fiber products, wood and paper products, and wood furniture manufacturing.

Table 5. Output values—Direct effects (DE)—for Mississippi agriculture and forestry by aggregated industries and gross absorption coefficients (GAC) based input purchases with value added (VA) and leakages from Mississippi in 2022 dollars.

Aggregated Industries	MS Direct Effect (DE)	Inputs (GAC)	VA (DE-GAC)	Leakage	Leakage %
Soybean farms	\$1,783,664,114	\$746,672,634	\$1,036,991,480	\$280,285,278	37.5%
Grain farms	\$782,999,495	\$661,734,770	\$121,264,725	\$306,174,654	46.3%
Other farms	\$385,371,603	\$224,096,348	\$161,275,256	\$108,632,312	48.5%
Cotton farms	\$624,494,740	\$371,562,153	\$252,932,587	\$37,360,052	10.1%
Cattle and dairy	\$343,481,791	\$228,758,762	\$114,723,030	\$35,857,811	15.7%
Poultry and egg	\$3,943,044,814	\$3,670,340,412	\$272,704,401	\$894,931,925	24.4%
Aquaculture and other animal production	\$503,400,277	\$123,479,024	\$379,921,252	\$6,785,682	5.5%
Logging	\$1,355,651,720	\$536,575,819	\$819,075,901	\$110,857,018	20.7%
Commercial fishing and wildlife	\$68,124,345	\$2,449,949	\$65,674,396	\$1,607,399	65.6%
Agricultural and forestry support activities	\$352,249,773	\$46,823,177	\$305,426,596	\$36,875,440	78.8%
Food and fiber products	\$12,365,773,938	\$9,604,254,520	\$2,761,519,418	\$5,604,869,979	58.4%
Wood and paper products	\$7,989,487,497	\$5,385,730,839	\$2,603,756,658	\$2,693,188,240	50.0%
Wood furniture manufacturing	\$2,925,002,146	\$2,018,624,284	\$906,377,862	\$909,897,086	45.1%
TOTALS	\$33,422,746,253	\$23,621,102,692	\$9,801,643,561	\$11,027,322,878	46.7%

RETAINING ECONOMIC LEAKAGE IN MISSISSIPPI

If intermediate input purchase leakages could be retained in Mississippi by soybean farms and by the other aggregated agriculture and forestry industries, what would be the increased economic benefit to Mississippi?

To answer that question, consider the leakage value resulting from out of state intermediate input purchases which totals to \$11,027,322,878 (Table 5). These intermediate input purchases were modeled as direct purchases from corresponding sectors within Mississippi. All the intermediate input purchase leakage values totaling to \$11,027,322,878 by the 91 IMPLAN agricultural and forestry production and processing sectors each corresponds to a commodity sector ranging from 3001 to 3538, which corresponds to the 538 IMPLAN industry sectors.¹

The increased economic impact of leakage retention by Mississippi's agriculture and forestry sectors to the Mississippi economy was modeled at a leakage retention of 25%, 50%, 75%, and 100% and are reported in Table 6. Table 6 presents four different retention scenarios, each showing the economic impact of varying levels of leakage retention—how much money stays within the economy versus how much leaves. The analysis focuses on employment, labor income, value added, and total economic output.

Baseline (MS - No Leakage Retained)

- **Employment:** 185,458
- **Labor Income:** \$9.2 billion
- **Value Added:** \$15.4 billion
- **Total Output:** \$46.15 billion

This is the baseline scenario where the economy

functions without any additional efforts to retain leakage (Table 1). The direct impact is strong, with 119,671 direct jobs and significant economic contributions. However, as money spent within the economy leaks out (for example, spent on goods and services produced outside the region), it limits the full potential of indirect and induced impacts.

25% Leakage Retained

- **Employment:** 196,282 (+10,824 jobs from baseline)
- **Labor Income:** \$9.74 billion (+\$545 million)
- **Value Added:** \$16.4 billion (+\$923 million)
- **Total Output:** \$48.96 billion (+\$2.08 billion)

When 25% of economic leakage is retained, there is a modest improvement in employment, income, and total output. The increase in direct, indirect, and induced jobs indicates that more businesses benefit from retained spending. This means local suppliers and service providers receive more business, leading to more job opportunities and increased wages.

Although the change is not dramatic, it demonstrates the benefits of reducing economic leakage, as more local money circulates within the economy. The multiplier effect starts to take shape, with each dollar retained generating further business activity.

50% Leakage Retained

- **Employment:** 207,106 (+21,648 from baseline)
- **Labor Income:** \$10.29 billion (+\$1.09 billion)
- **Value Added:** \$17.28 billion (+\$1.84 billion)
- **Total Output:** \$51.73 billion (+\$5.58 billion)

At 50% leakage retention, the effects become more

¹ Of the 538 IMPLAN sectors, there are 37 sectors that do not exist in the Mississippi economy. Thus, input purchases for these sectors will continue to be a leakage in the modeled scenarios amounting to a leakage of about 4% of the retained \$11,027,322,878. These sectors are 67-Malt manufacturing, 68-Wet corn milling, 70-Fats and oils refining and blending, 72-Beet sugar manufacturing, 73-Sugar cane mills and refining, 74-Nonchocolate confectionery manufacturing, 75-Chocolate and confectionery manufacturing from cacao beans, 77-Frozen fruits, juices and vegetables manufacturing, 80-Canned specialties, 83-Dry, condensed, and evaporated dairy product manufacturing, 85-Creamery butter manufacturing, 96-Tortilla manufacturing, 101-Mayonnaise, dressing, and sauce manufacturing, 112-Narrow fabric mills and schiffli machine embroidery, 114-Knit fabric mills, 117-Carpet and rug mills, 130-Footwear manufacturing, 168-Phosphatic fertilizer manufacturing, 174-Biological product (except diagnostic) manufacturing, 179-Surface active agent manufacturing, 181-Printing ink manufacturing, 199-Flat glass manufacturing, 201-Glass container manufacturing, 208-Lime manufacturing, 209-Gypsum product manufacturing, 210-Abrasive product manufacturing, 219-Alumina refining and primary aluminum production, 274-Heating equipment (except warm air furnaces) manufacturing, 281-Turbine and turbine generator set units manufacturing, 298-Electronic computer manufacturing, 310-Other electronic component manufacturing, 319-Watch, clock, and other measuring and controlling device manufacturing, 321-Software and other prerecorded and record reproducing, 333-Storage battery manufacturing, 334-Primary battery manufacturing, 338-Carbon and graphite product manufacturing, 388-Fasteners, buttons, needles, and pins manufacturing.

significant. Employment crosses 195,000 jobs, meaning 10,000 more people have jobs compared to the baseline. The economy is now retaining nearly \$2 billion more in output, strengthening local businesses, increasing tax revenues, and reducing dependence on external markets.

This scenario suggests that investing in local supply chains, workforce development, and incentives for businesses to source locally can pay off substantially. The increased spending power of employees further boosts local demand for goods and services, expanding industries like retail, housing, and entertainment.

75% Leakage Retained

- **Employment:** 217,9292 (+32,471 from baseline)
- **Labor Income:** \$10.83 billion (+\$1.63 billion)
- **Value Added:** \$18.20 billion (+\$2.77 billion)
- **Total Output:** \$54.52 billion (+\$8.37 billion)

Retaining 75% of leakage produces even greater economic benefits. Employment crosses 200,000, meaning thousands more people have stable jobs and

higher earnings. The economy sees an additional \$3 billion in total output compared to the baseline, and local businesses benefit from higher demand.

This scenario demonstrates how a region can become more self-sufficient by minimizing reliance on outside goods and services. Economic resilience improves because local industries capture more revenue, leading to greater investments, innovation, and community development.

At this level, policy interventions become critical. Governments and businesses must actively work to keep supply chains, investments, and consumer spending within the region through:

- **Local procurement policies**
- **Business incentives**
- **Skill training programs**
- **Infrastructure investments**

These actions ensure that more of the wealth created by the economy stays and circulates locally.

Table 6. Economic impact of leakage retention for intermediate input purchase by Mississippi's agricultural and forestry production and processing sectors indicating effects from retaining leakage of 25%, 50%, 75%, and 100% with values expressed in 2022 dollars.					
2022 data	Impact	Employment	Labor Income	Value Added	Output
25% Leakage Retained	1 - Direct	10,014	\$505,366,685	\$830,326,120	\$2,658,541,898
	2 - Indirect	205	\$8,263,730	\$18,057,299	\$34,659,151
	3 - Induced	604	\$31,831,058	\$75,193,975	\$110,438,558
	TOTAL	10,824	\$545,461,473	\$923,577,395	\$2,803,639,607
50% Leakage Retained	1 - Direct	20,029	\$1,008,286,601	\$1,656,213,978	\$5,290,170,344
	2 - Indirect	410	\$16,695,813	\$36,458,742	\$69,905,797
	3 - Induced	1,209	\$64,418,524	\$151,655,244	\$222,633,102
	TOTAL	21,648	\$1,089,400,938	\$1,844,327,964	\$5,582,709,243
75% Leakage Retained	1 - Direct	30,043	\$1,512,429,902	\$2,484,320,966	\$7,935,255,516
	2 - Indirect	616	\$25,043,719	\$54,688,113	\$104,858,696
	3 - Induced	1,813	\$96,627,786	\$227,482,866	\$333,949,653
	TOTAL	32,471	\$1,634,101,407	\$2,766,491,946	\$8,374,063,865
100% Leakage Retained	1 - Direct	40,057	\$2,016,573,202	\$3,312,427,955	\$10,580,340,688
	2 - Indirect	821	\$33,391,625	\$72,917,484	\$139,811,594
	3 - Induced	2,417	\$128,837,049	\$303,310,488	\$445,266,205
	TOTAL	43,295	\$2,178,801,876	\$3,688,655,928	\$11,165,418,487

100% Leakage Retained (Fully Self-Sufficient Supply Chain)

- **Employment:** 228,753 (+43,295 from baseline)
- **Labor Income:** \$11.38 billion (+\$2.18 billion)
- **Value Added:** \$19.12 billion (+\$3.69 billion)
- **Total Output:** \$57.32 billion (+\$11.17 billion)

This scenario assumes that all economic leakage from agriculture and forestry is eliminated, meaning every dollar spent by agriculture and forestry for intermediate inputs remains within the economy. This ideal situation results in:

- **Over 228,750 total jobs**
- **A \$2.18 billion increase in labor income from the baseline**
- **A \$11.17 billion jump in total economic output**

This scenario would require full local supply chain integration, meaning all goods, services, and labor are sourced within the region. While this is unlikely in a globalized world, it highlights the upper limit of economic potential if a region's agriculture and forestry supply chain is fully self-sufficient.

This scenario suggests that economic localization

efforts can create substantial economic stability and job security. However, full self-sufficiency is difficult, as some industries will always require external inputs, imports, or specialized skills. The key takeaway is that striving to retain as much economic activity as possible results in higher employment, stronger businesses, and a more resilient economy.

Key Takeaways

1. Higher leakage retention leads to more jobs, better wages, and stronger economic growth.
2. Even modest improvements (25%-50% retention) can generate billions in additional economic activity.
3. Strategic investments in local businesses, supply chains, and workforce development can reduce leakage and maximize economic impact.
4. Total self-sufficiency is unlikely, but reducing reliance on external sources strengthens economic resilience and sustainability.

These retention scenarios highlight the power of local economic development and the importance of keeping money circulating within a community to build a stronger, more prosperous economy in Mississippi.

DISCUSSION

This study provides a detailed analysis of economic leakage in Mississippi's agricultural and forestry sectors, revealing substantial outflows of economic activity to other regions due to out-of-state input purchases. By using a MRIO approach, the analysis highlights key sectors where leakage is most pronounced and explores the potential economic benefits of retaining a portion of this leakage within the state. The results demonstrate the interconnectedness of Mississippi's economy with other regions and underline the significant opportunity for local economic development through targeted interventions.

The results indicate that substantial economic leakage occurs in Mississippi's agricultural and forestry sectors due to out-of-state input purchasing. Of the \$33.4 billion in direct production output for these sectors in 2022, over \$11 billion (46.7%) was spent on inputs sourced outside Mississippi. Leakage rates varied substantially among the sectors, with secondary processing industries such as wood furniture manufacturing and food and fiber products exhibiting the highest levels of out-of-state purchases, at 45.1% and 58.4%, respectively. While primary production sectors such as cotton farming exhibited lower leakage rates (10.1%), these findings highlight systemic challenges in retaining economic activity within the state.

Leakage volumes were highest in sectors involving value-added processing, such as food and fiber products (\$5.6 billion) and wood and paper products (\$2.7 billion). By comparison, primary production industries such as aquaculture and other animal production had minimal leakage, retaining 94.5% of their inputs within the state. These discrepancies indicate an underdeveloped infrastructure and supply chain for higher-value industries, where opportunities to retain economic benefits are being lost to other regions. The uneven distribution of leakage suggests that targeted interventions in processing and

manufacturing could have a transformative impact on Mississippi's economy.

Benefits of Leakage Retention

The scenario analysis for retaining 25%, 50%, 75%, and 100% of the leakage illustrates the transformative potential of reducing economic outflows. Retaining just 25% of the leakage could increase Mississippi's total economic contributions to \$48.9 billion, creating an additional 10,824 jobs and \$545 million in wages. A more ambitious scenario of 100% retention would yield \$57.3 billion in total economic output, adding 43,295 jobs and nearly \$2.2 billion in additional wages. This demonstrates that even incremental reductions in leakage can substantially enhance the state's economic resilience, employment opportunities, and tax revenues. These findings underscore the need for strategic investments in local supply chains, value-added industries, and policy frameworks to minimize economic outflows.

The results also reveal significant spillover benefits accruing to other regions in the U.S. due to Mississippi's economic leakage. Regions such as the Atlantic and Midwest derive substantial indirect and induced contributions from Mississippi's out-of-state purchases, highlighting the interconnected nature of national supply chains. For example, the food and fiber products sector contributed \$747 million in input purchases to the Atlantic region alone, while the wood and paper products sector similarly supported significant economic activity in the Midwest and Plains regions. For Mississippi, this underscores the need to strengthen internal linkages and reduce dependency on external inputs. Developing local industries to meet input demands could not only reduce leakage but also stimulate broader economic development in rural areas that are heavily reliant on agriculture and forestry.

CONCLUSION

The interconnectedness of Mississippi's economy with national markets is evident, but this interdependence also reveals the state's economic vulnerabilities. Currently, nearly \$11 billion in production inputs flow to out-of-state suppliers, particularly in regions such as the Atlantic, Midwest, and West. These outflows support jobs and growth elsewhere—jobs and growth that could instead reside in Mississippi. By implementing policy interventions that encourage local procurement, provide business incentives, and expand sector-specific capacity, the state can reclaim a significant share of this economic activity within Mississippi instead of flowing to other states.

From this research, Mississippi economic development and other state-level policy setting entities can glean the following:

1. Mississippi loses nearly \$11 billion a year in agricultural and forestry spending to other states—

money that could be building jobs and businesses here at home.

2. If Mississippi retained just half of its economic leakage, it would generate over 21,000 new jobs and add more than \$5.5 billion to the state's economy.
3. Closing the gap on economic leakage is one of Mississippi's biggest untapped growth opportunities—one that strengthens our communities, creates skilled jobs, and builds long-term resilience.

These results highlight a potential clear path forward: retaining more of what Mississippi already produces can be an economic development strategy with sizeable growth opportunities. Doing so not only unlocks immediate economic gains, but it also lays the foundation for a stronger, more self-reliant Mississippi economy and one that is more robust against out-of-state disruptions.

Implan 546	Implan 546 Description	2022 NAICS Code
323	Lighting fixture manufacturing	335131 335132 335139
324	Small electrical appliance manufacturing	335210
325	Household cooking appliance manufacturing	335220
326	Household refrigerator and home freezer manufacturing	335220
327	Household laundry equipment manufacturing	335220
328	Other major household appliance manufacturing	335220
329	Power, distribution, and specialty transformer manufacturing	335311
330	Motor and generator manufacturing	335312
331	Switchgear and switchboard apparatus manufacturing	335313
332	Relay and industrial control manufacturing	335314
333	Storage battery manufacturing	335910
334	Primary battery manufacturing	335910
335	Fiber optic cable manufacturing	335921
336	Other communication and energy wire manufacturing	335929
337	Wiring device manufacturing	335931 335932
338	Carbon and graphite product manufacturing	335991
339	All other miscellaneous electrical equipment and component manufacturing	335999
340	Automobile manufacturing	336110
341	Light truck and utility vehicle manufacturing	336110
342	Heavy duty truck manufacturing	336120
343	Motor vehicle body manufacturing	336211
344	Truck trailer manufacturing	336212
345	Motor home manufacturing	336213
346	Travel trailer and camper manufacturing	336214
347	Motor vehicle gasoline engine and engine parts manufacturing	336310
348	Motor vehicle electrical and electronic equipment manufacturing	336320
349	Motor vehicle transmission and power train parts manufacturing	336350
350	Motor vehicle seating and interior trim manufacturing	336360
351	Motor vehicle metal stamping	336370
352	Other motor vehicle parts manufacturing	336390
353	Motor vehicle steering, suspension component (except spring), and brake systems manufacturing	336330 336340
354	Aircraft manufacturing	336411
355	Aircraft engine and engine parts manufacturing	336412
356	Other aircraft parts and auxiliary equipment manufacturing	336413
357	Guided missile and space vehicle manufacturing	336414
358	Propulsion units and parts for space vehicles and guided missiles manufacturing	336415 336419
359	Railroad rolling stock manufacturing	336510
360	Ship building and repairing	336611

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022).

MODEL SECTORS	Original IMPLAN Sectors
SOYBEAN FARMS	1 Oilseed farming
GRAIN FARMS	2 Grain farming
OTHER FARMS	3 Vegetable and melon farming; 4 Fruit farming; 5 Tree nut farming; 6 Greenhouse, nursery, and floriculture production; 7 Tobacco farming; 9 Sugarcane and sugar beet farming; 10 All other crop farming
COTTON FARMS	8 Cotton farming
CATTLE AND DAIRY	11 Cattle ranching and farming; 12 Dairy cattle and milk production
POULTRY AND EGG	13 Poultry and egg production
AQUACULTURE AND OTHER ANIMAL PRODUCTION	14 Animal production, except cattle and poultry and eggs
LOGGING	16 Commercial logging
COMMERCIAL FISHING AND WILDLIFE	17 Commercial fishing; 18 Commercial hunting and trapping
AGRICULTURAL AND FORESTRY SUPPORT ACTIVITIES	15 Forestry, forest products, and timber tract production; 19 Support activities for agriculture and forestry
FOOD AND FIBER PRODUCTS	63 Dog and cat food manufacturing; 64 Other animal food manufacturing; 65 Flour milling; 66 Rice milling; 67 Malt manufacturing; 68 Wet corn milling; 69 Soybean and other oilseed processing; 70 Fats and oils refining and blending; 71 Breakfast cereal manufacturing; 72 Beet sugar manufacturing; 73 Sugar cane mills and refining; 74 Nonchocolate confectionery manufacturing; 75 Chocolate and confectionery manufacturing from cacao beans; 76 Confectionery manufacturing from purchased chocolate; 77 Frozen fruits, juices and vegetables manufacturing; 78 Frozen specialties manufacturing; 79 Canned fruits and vegetables manufacturing; 80 Canned specialties; 81 Dehydrated food products manufacturing; 82 Cheese manufacturing; 83 Dry, condensed, and evaporated dairy product manufacturing; 84 Fluid milk manufacturing; 85 Creamery butter manufacturing; 86 Ice cream and frozen dessert manufacturing; 87 Frozen cakes and other pastries manufacturing; 88 Poultry processing; 89 Animal, except poultry, slaughtering; 90 Meat processed from carcasses; 91 Rendering and meat byproduct processing; 92 Seafood product preparation and packaging; 93 Bread and bakery product, except frozen, manufacturing; 94 Cookie and cracker manufacturing; 95 Dry pasta, mixes, and dough manufacturing; 96 Tortilla manufacturing; 97 Roasted nuts and peanut butter manufacturing; 98 Other snack food manufacturing; 99 Coffee and tea manufacturing; 100 Flavoring syrup and concentrate manufacturing; 101 Mayonnaise, dressing, and sauce manufacturing; 102 Spice and extract manufacturing; 103 All other food manufacturing; 104 Bottled and canned soft drinks & water; 105 Manufactured ice; 106 Breweries; 107 Wineries; 108 Distilleries; 109 Tobacco product manufacturing; 110 Fiber, yarn, and thread mills; 111 Broadwoven fabric mills; 112 Narrow fabric mills and schiffli machine embroidery; 113 Nonwoven fabric mills; 114 Knit fabric mills; 115 Textile and fabric finishing mills; 116 Fabric coating mills; 117 Carpet and rug mills; 118 Curtain and linen mills; 119 Textile bag and canvas mills; 120 Rope, cordage, twine, tire cord and tire fabric mills; 121 Other textile product mills; 122 Hosiery and sock mills; 123 Other apparel knitting mills; 124 Cut and sew apparel contractors;

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022) (continued).

MODEL SECTORS	Original IMPLAN Sectors
FOOD AND FIBER PRODUCTS	125 Men's and boys' cut and sew apparel manufacturing; 126 Women's and girls' cut and sew apparel manufacturing; 127 Other cut and sew apparel manufacturing; 128 Apparel accessories and other apparel manufacturing; 129 Leather and hide tanning and finishing; 130 Footwear manufacturing; 131 Other leather and allied product manufacturing
WOOD AND PAPER PRODUCTS	132 Sawmills; 133 Wood preservation; 134 Veneer and plywood manufacturing; 135 Engineered wood member and truss manufacturing; 136 Reconstituted wood product manufacturing; 137 Wood windows and door manufacturing; 138 Cut stock, resawing lumber, and planing; 139 Other millwork, including flooring; 140 Wood container and pallet manufacturing; 142 Prefabricated wood building manufacturing; 143 All other miscellaneous wood product manufacturing; 144 Pulp mills; 145 Paper mills; 146 Paperboard mills; 147 Paperboard container manufacturing; 148 Paper bag and coated and treated paper manufacturing; 149 Stationery product manufacturing; 150 Sanitary paper product manufacturing; 151 All other converted paper product manufacturing
WOOD FURNITURE MANUFACTURING	365 Wood kitchen cabinet and countertop manufacturing; 366 Upholstered household furniture manufacturing; 367 Nonupholstered wood household furniture manufacturing; 370 Wood office furniture manufacturing; 371 Custom architectural woodwork and millwork
The remaining model sectors include all non-agriculture-related sectors.	
MINING	20 Oil and gas extraction; 21 Coal mining; 22 Copper, nickel, lead, and zinc mining; 23 Iron ore mining; 24 Gold ore mining; 25 Silver ore mining; 26 Uranium-radium-vanadium ore mining; 27 Other metal ore mining; 28 Stone mining and quarrying; 29 Sand and gravel mining; 30 Other clay, ceramic, refractory minerals mining; 31 Potash, soda, and borate mineral mining; 32 Phosphate rock mining; 33 Other chemical and fertilizer mineral mining; 34 Other nonmetallic minerals; 35 Drilling oil and gas wells; 36 Support activities for oil and gas operations; 37 Metal mining services; 38 Other nonmetallic minerals services
UTILITIES	39 Electric power generation - Hydroelectric; 40 Electric power generation - Fossil fuel; 41 Electric power generation - Nuclear; 42 Electric power generation - Solar; 43 Electric power generation - Wind; 44 Electric power generation - Geothermal; 45 Electric power generation - Biomass; 46 Electric power generation - All other; 47 Electric power transmission and distribution; 48 Natural gas distribution; 49 Water, sewage and other systems; 527 Federal electric utilities; 530 State government electric utilities; 533 Local government electric utilities
CONSTRUCTION	50 Construction of new health care structures; 51 Construction of new manufacturing structures; 52 Construction of new power and communication structures; 53 Construction of new educational and vocational structures; 54 Construction of new highways and streets; 55 Construction of new commercial structures, including farm structures; 56 Construction of other new nonresidential structures; 57 Construction of new single-family residential structures; 58 Construction of new multifamily residential structures; 59 Construction of other new residential structures; 60 Maintenance and repair construction of nonresidential structures; 61 Maintenance and repair construction of residential structures; 62 Maintenance and repair construction of highways, streets, bridges, and tunnels
MANUFACTURING	141 Manufactured home (mobile home) manufacturing; 152 Printing; 153 Support activities for printing; 154 Petroleum refineries; 155 Asphalt paving mixture and block manufacturing; 156 Asphalt shingle and coating materials manufacturing; 157 Petroleum lubricating oil and grease manufacturing; 158 All other petroleum and coal products manufacturing; 159 Petrochemical manufacturing; 160 Industrial gas manufacturing; 161 Synthetic dye and pigment manufacturing; 162 Other basic inorganic chemical manufacturing; 163 Other basic organic chemical manufacturing; 164 Plastics material and resin manufacturing; 165 Synthetic rubber manufacturing; 166 Artificial and synthetic fibers and filaments manufacturing; 167 Nitrogenous fertilizer manufacturing; 168 Phosphatic fertilizer manufacturing; 169 Fertilizer mixing; 170 Pesticide and other agricultural chemical manufacturing; 171 Medicinal and botanical manufacturing; 172 Pharmaceutical preparation manufacturing; 173 In-vitro diagnostic substance manufacturing; 174 Biological product (except diagnostic) manufacturing; 175 Paint and coating manufacturing; 176 Adhesive manufacturing; 177 Soap and other detergent manufacturing;

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022) (continued).

MODEL SECTORS	Original IMPLAN Sectors
MANUFACTURING	<p>178 Polish and other sanitation good manufacturing; 179 Surface active agent manufacturing; 180 Toilet preparation manufacturing; 181 Printing ink manufacturing; 182 Explosives manufacturing; 183 Custom compounding of purchased resins; 184 Photographic film and chemical manufacturing; 185 Other miscellaneous chemical product manufacturing; 186 Plastics packaging materials and unlaminated film and sheet manufacturing; 187 Unlaminated plastics profile shape manufacturing; 188 Plastics pipe and pipe fitting manufacturing; 189 Laminated plastics plate, sheet (except packaging), and shape manufacturing; 190 Polystyrene foam product manufacturing; 191 Urethane and other foam product (except polystyrene) manufacturing; 192 Plastics bottle manufacturing; 193 Other plastics product manufacturing; 194 Tire manufacturing; 195 Rubber and plastics hoses and belting manufacturing; 196 Other rubber product manufacturing; 197 Pottery, ceramics, and plumbing fixture manufacturing; 198 Brick, tile, and other structural clay product manufacturing; 199 Flat glass manufacturing; 200 Other pressed and blown glass and glassware manufacturing; 201 Glass container manufacturing; 202 Glass product manufacturing made of purchased glass; 203 Cement manufacturing; 204 Ready-mix concrete manufacturing; 205 Concrete block and brick manufacturing; 206 Concrete pipe manufacturing; 207 Other concrete product manufacturing; 208 Lime manufacturing; 209 Gypsum product manufacturing; 210 Abrasive product manufacturing; 211 Cut stone and stone product manufacturing; 212 Ground or treated mineral and earth manufacturing; 213 Mineral wool manufacturing; 214 Miscellaneous nonmetallic mineral products manufacturing; 215 Iron and steel mills and ferroalloy manufacturing; 216 Iron, steel pipe and tube manufacturing from purchased steel; 217 Rolled steel shape manufacturing; 218 Steel wire drawing; 219 Alumina refining and primary aluminum production; 220 Secondary smelting and alloying of aluminum; 221 Aluminum sheet, plate, and foil manufacturing; 222 Other aluminum rolling, drawing and extruding; 223 Nonferrous metal (exc aluminum) smelting and refining; 224 Copper rolling, drawing, extruding and alloying; 225 Nonferrous metal, except copper and aluminum, shaping; 226 Secondary processing of other nonferrous metals; 227 Ferrous metal foundries; 228 Nonferrous metal foundries; 229 Custom roll forming; 230 Crown and closure manufacturing and metal stamping; 231 Iron and steel forging; 232 Nonferrous forging; 233 Cutlery, utensil, pot, and pan manufacturing; 234 Handtool manufacturing; 235 Prefabricated metal buildings and components manufacturing; 236 Fabricated structural metal manufacturing; 237 Plate work manufacturing; 238 Metal window and door manufacturing; 239 Sheet metal work manufacturing; 240 Ornamental and architectural metal work manufacturing; 241 Power boiler and heat exchanger manufacturing; 242 Metal tank (heavy gauge) manufacturing; 243 Metal cans manufacturing; 244 Metal barrels, drums and pails manufacturing; 245 Hardware manufacturing; 246 Spring and wire product manufacturing; 247 Machine shops; 248 Turned product and screw, nut, and bolt manufacturing; 249 Metal heat treating; 250 Metal coating and nonprecious engraving; 251 Electroplating, anodizing, and coloring metal; 252 Valve and fittings, other than plumbing, manufacturing; 253 Plumbing fixture fitting and trim manufacturing; 254 Ball and roller bearing manufacturing; 255 Small arms ammunition manufacturing; 256 Ammunition, except for small arms, manufacturing; 257 Small arms, ordnance, and accessories manufacturing; 258 Fabricated pipe and pipe fitting manufacturing; 259 Other fabricated metal manufacturing; 260 Farm machinery and equipment manufacturing; 261 Lawn and garden equipment manufacturing; 262 Construction machinery manufacturing; 263 Mining machinery and equipment manufacturing; 264 Oil and gas field machinery and equipment manufacturing; 265 Semiconductor machinery manufacturing; 266 Food product machinery manufacturing; 267 Sawmill, woodworking, and paper machinery; 268 Printing machinery and equipment manufacturing; 269 All other industrial machinery manufacturing; 270 Optical instrument and lens manufacturing; 271 Photographic and photocopying equipment manufacturing; 272 Other commercial service industry machinery manufacturing; 273 Air purification and ventilation equipment manufacturing; 274 Heating equipment (except warm air furnaces) manufacturing; 275 Air conditioning, refrigeration, and warm air heating equipment manufacturing; 276 Industrial mold manufacturing; 277 Special tool, die, jig, and fixture manufacturing; 278 Cutting tool and machine tool accessory manufacturing; 279 Machine tool manufacturing; 280 Rolling mill and other metalworking machinery manufacturing; 281 Turbine and turbine generator set units manufacturing;</p>

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022) (continued).

MODEL SECTORS	Original IMPLAN Sectors
MANUFACTURING	<p>282 Speed changer, industrial high-speed drive, and gear manufacturing; 283 Mechanical power transmission equipment manufacturing; 284 Other engine equipment manufacturing; 285 Pump and pumping equipment manufacturing; 286 Air and gas compressor manufacturing; 287 Elevator and moving stairway manufacturing; 288 Conveyor and conveying equipment manufacturing; ; 289 Overhead cranes, hoists, and monorail systems manufacturing; 290 Industrial truck, trailer, and stacker manufacturing; 291 Power-driven handtool manufacturing; 292 Welding and soldering equipment manufacturing; 293 Packaging machinery manufacturing; 294 Industrial process furnace and oven manufacturing; 295 Fluid power cylinder and actuator manufacturing; 296 Fluid power pump and motor manufacturing; 297 Scales, balances, and miscellaneous general purpose machinery manufacturing; 298 Electronic computer manufacturing; 299 Computer storage device manufacturing; 300 Computer terminals and other computer peripheral equipment manufacturing; 301 Telephone apparatus manufacturing; 302 Broadcast and wireless communications equipment manufacturing; 303 Other communications equipment manufacturing; 304 Audio and video equipment manufacturing; 305 Printed circuit assembly (electronic assembly) manufacturing; 306 Bare printed circuit board manufacturing; 307 Semiconductor and related device manufacturing; 308 Capacitor, resistor, coil, transformer, and other inductor manufacturing; 309 Electronic connector manufacturing; 310 Other electronic component manufacturing; 311 Electromedical and electrotherapeutic apparatus manufacturing; 312 Search, detection, and navigation instruments manufacturing; 313 Automatic environmental control manufacturing; 314 Industrial process variable instruments manufacturing; 315 Totalizing fluid meter and counting device manufacturing; 316 Electricity and signal testing instruments manufacturing; 317 Analytical laboratory instrument manufacturing; 318 Irradiation apparatus manufacturing; 319 Watch, clock, and other measuring and controlling device manufacturing; 320 Blank magnetic and optical recording media manufacturing; 321 Software and other prerecorded and record reproducing; 322 Electric lamp bulb and part manufacturing; 323 Lighting fixture manufacturing; 324 Small electrical appliance manufacturing; 325 Household cooking appliance manufacturing; 326 Household refrigerator and home freezer manufacturing; 327 Household laundry equipment manufacturing; 328 Other major household appliance manufacturing; 329 Power, distribution, and specialty transformer manufacturing; 330 Motor and generator manufacturing; 331 Switchgear and switchboard apparatus manufacturing; 332 Relay and industrial control manufacturing; 333 Storage battery manufacturing; 334 Primary battery manufacturing; 335 Fiber optic cable manufacturing; 336 Other communication and energy wire manufacturing; 337 Wiring device manufacturing; 338 Carbon and graphite product manufacturing; 339 All other miscellaneous electrical equipment and component manufacturing; 340 Automobile manufacturing; 341 Light truck and utility vehicle manufacturing; 342 Heavy duty truck manufacturing; 343 Motor vehicle body manufacturing; 344 Truck trailer manufacturing; 345 Motor home manufacturing; 346 Travel trailer and camper manufacturing; 347 Motor vehicle gasoline engine and engine parts manufacturing; 348 Motor vehicle electrical and electronic equipment manufacturing; 349 Motor vehicle transmission and power train parts manufacturing; 350 Motor vehicle seating and interior trim manufacturing; 351 Motor vehicle metal stamping; 352 Other motor vehicle parts manufacturing; 353 Motor vehicle steering, suspension component (except spring), and brake systems manufacturing; 354 Aircraft manufacturing; 355 Aircraft engine and engine parts manufacturing; 356 Other aircraft parts and auxiliary equipment manufacturing; 357 Guided missile and space vehicle manufacturing; 358 Propulsion units and parts for space vehicles and guided missiles manufacturing; 359 Railroad rolling stock manufacturing; 360 Ship building and repairing; 361 Boat building; 362 Motorcycle, bicycle, and parts manufacturing; 363 Military armored vehicle, tank, and tank component manufacturing; 364 All other transportation equipment manufacturing; 368 Other household nonupholstered furniture manufacturing; 369 Institutional furniture manufacturing; 372 Office furniture, except wood, manufacturing; 373 Showcase, partition, shelving, and locker manufacturing; 374 Mattress manufacturing; 375 Blind and shade manufacturing; 376 Surgical and medical instrument manufacturing; 377 Surgical appliance and supplies manufacturing; 378 Dental equipment and supplies manufacturing; 379 Ophthalmic goods manufacturing; 380 Dental laboratories;</p>

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022) (continued).

MODEL SECTORS	Original IMPLAN Sectors
MANUFACTURING	381 Jewelry and silverware manufacturing; 382 Sporting and athletic goods manufacturing; 383 Doll, toy, and game manufacturing; 384 Office supplies (except paper) manufacturing; 385 Sign manufacturing; 386 Gasket, packing, and sealing device manufacturing; 387 Musical instrument manufacturing; 388 Fasteners, buttons, needles, and pins manufacturing; 389 Broom, brush, and mop manufacturing; 390 Burial casket manufacturing; 391 All other miscellaneous manufacturing
WHOLESALE TRADE	392 Wholesale - Motor vehicle and motor vehicle parts and supplies; 393 Wholesale - Professional and commercial equipment and supplies; 394 Wholesale - Household appliances and electrical and electronic goods; 395 Wholesale - Machinery, equipment, and supplies; 396 Wholesale - Other durable goods merchant wholesalers; 397 Wholesale - Drugs and druggists' sundries; 398 Wholesale - Grocery and related product wholesalers; 399 Wholesale - Petroleum and petroleum products; 400 Wholesale - Other nondurable goods merchant wholesalers; 401 Wholesale - Wholesale electronic markets and agents and brokers
RETAIL TRADE	402 Retail - Motor vehicle and parts dealers; 403 Retail - Furniture and home furnishings stores; 404 Retail - Electronics and appliance stores; 405 Retail - Building material and garden equipment and supplies stores; 406 Retail - Food and beverage stores; 407 Retail - Health and personal care stores; 408 Retail - Gasoline stores; 409 Retail - Clothing and clothing accessories stores; 410 Retail - Sporting goods, hobby, musical instrument and book stores; 411 Retail - General merchandise stores; 412 Retail - Miscellaneous store retailers; 413 Retail - Nonstore retailers
TRANSPORTATION AND WAREHOUSING	414 Air transportation; 415 Rail transportation; 416 Water transportation; 417 Truck transportation; 418 Transit and ground passenger transportation; 419 Pipeline transportation; 420 Scenic and sightseeing transportation and support activities for transportation; 421 Couriers and messengers; 422 Warehousing and storage; 526 Postal service; 529 State government passenger transit; 532 Local government passenger transit
INFORMATION	423 Newspaper publishers; 424 Periodical publishers; 425 Book publishers; 426 Directory, mailing list, and other publishers; 427 Greeting card publishing; 428 Software publishers; 429 Motion picture and video industries; 430 Sound recording industries; 431 Radio and television broadcasting; 432 Cable and other subscription programming; 433 Wired telecommunications carriers; 434 Wireless telecommunications carriers (except satellite); 435 Satellite, telecommunications resellers, and all other telecommunications; 436 Data processing, hosting, and related services; 437 News syndicates, libraries, archives and all other information services; 438 Internet publishing and broadcasting and web search portals
FINANCE AND INSURANCE	439 Nondepository credit intermediation and related activities; 440 Securities and commodity contracts intermediation and brokerage; 441 Monetary authorities and depository credit intermediation; 442 Other financial investment activities; 443 Direct life insurance carriers; 444 Insurance carriers, except direct life; 445 Insurance agencies, brokerages, and related activities; 446 Funds, trusts, and other financial vehicles
REAL ESTATE AND RENTAL	447 Other real estate; 448 Tenant-occupied housing; 449 Owner-occupied dwellings; 450 Automotive equipment rental and leasing; 451 General and consumer goods rental except video tapes and discs; 452 Video tape and disc rental; 453 Commercial and industrial machinery and equipment rental and leasing; 454 Lessors of nonfinancial intangible assets
PROFESSIONAL-SCIENTIFIC AND TECH SERVICES	455 Legal services; 456 Accounting, tax preparation, bookkeeping, and payroll services; 457 Architectural, engineering, and related services; 458 Specialized design services; 459 Custom computer programming services; 460 Computer systems design services; 461 Other computer related services, including facilities management; 462 Management consulting services; 463 Environmental and other technical consulting services; 464 Scientific research and development services; 465 Advertising, public relations, and related services; 466 Photographic services; 467 Veterinary services; 468 Marketing research and all other miscellaneous professional, scientific, and technical services

Table A.2. Aggregation scheme of commercial sectors used for IMPLAN input-output analysis of agricultural and forestry production and processing on the Mississippi economy (2022) (continued).

MODEL SECTORS	Original IMPLAN Sectors
MANAGEMENT OF COMPANIES, ADMINISTRATIVE AND WASTE SERVICES	469 Management of companies and enterprises; 470 Office administrative services; 471 Facilities support services; 472 Employment services; 473 Business support services; 474 Travel arrangement and reservation services; 475 Investigation and security services; 476 Services to buildings; 477 Landscape and horticultural services; 478 Other support services; 479 Waste management and remediation services
EDUCATIONAL SERVICES	480 Elementary and secondary schools; 481 Junior colleges, colleges, universities, and professional schools; 482 Other educational services
HEALTH AND SOCIAL SERVICES	483 Offices of physicians; 484 Offices of dentists; 485 Offices of other health practitioners; 486 Outpatient care centers; 487 Medical and diagnostic laboratories; 488 Home health care services; 489 Other ambulatory health care services; 490 Hospitals; 491 Nursing and community care facilities; 492 Residential mental retardation, mental health, substance abuse and other facilities; 493 Individual and family services; 494 Child day care services; 495 Community food, housing, and other relief services, including rehabilitation services
ARTS-ENTERTAINMENT AND RECREATION	496 Performing arts companies; 497 Commercial sports except racing; 498 Racing and track operation; 499 Independent artists, writers, and performers; 500 Promoters of performing arts and sports and agents for public figures; 501 Museums, historical sites, zoos, and parks; 502 Amusement parks and arcades; 503 Gambling industries (except casino hotels); 504 Other amusement and recreation industries; 505 Fitness and recreational sports centers; 506 Bowling centers
ACCOMMODATION AND FOOD SERVICES	507 Hotels and motels, including casino hotels; 508 Other accommodations; 509 Full-service restaurants; 510 Limited-service restaurants; 511 All other food and drinking places
OTHER SERVICES	512 Automotive repair and maintenance, except car washes; 513 Car washes; 514 Electronic and precision equipment repair and maintenance; 515 Commercial and industrial machinery and equipment repair and maintenance; 516 Personal and household goods repair and maintenance; 517 Personal care services; 518 Death care services; 519 Dry-cleaning and laundry services; 520 Other personal services; 521 Religious organizations; 522 Grantmaking, giving, and social advocacy organizations; 523 Business and professional associations; 524 Labor and civic organizations; 525 Private households
GOVERNMENT AND NON-NAICS	528 Other federal government enterprises; 531 Other state government enterprises; 534 Other local government enterprises; 535 * Not an industry (Used and secondhand goods); 536 * Not an industry (Scrap); 537 * Not an industry (Rest of world adjustment); 538 * Not an industry (Noncomparable foreign imports); 539 * Employment and payroll of state govt, education; 540 * Employment and payroll of state govt, hospitals and health services; 541 * Employment and payroll of state govt, other services; 542 * Employment and payroll of local govt, education; 543 * Employment and payroll of local govt, hospitals and health services; 544 * Employment and payroll of local govt, other services; 545 * Employment and payroll of federal govt, military; 546 * Employment and payroll of federal govt, non-military; 539 * Employment and payroll of state govt, education; 540 * Employment and payroll of state govt, non-education; 541 * Employment and payroll of local govt, education; 542 * Employment and payroll of local govt, non-education; 543 * Employment and payroll of federal govt, military; 544 * Employment and payroll of federal govt, non-military

Table A.3.1.A. Input purchases for the oilseed farming sector (IMPLAN #1) ranked by total out of Mississippi (Non-MS) purchases by region* in 2022 dollars.

Description	Code	Mississippi	Louisiana	Alabama	Arkansas	Tennessee
TOTAL PURCHASES	--	\$466,387,356	\$57,107,362	\$1,867,496	\$59,422,331	\$20,657,968
Other real estate services	3447	\$82,336,420	\$10,081,782	\$329,689	\$10,490,469	\$3,646,975
Support activities for agriculture and forestry	3019	\$81,110,844	\$9,931,715	\$324,782	\$10,334,318	\$3,592,690
Oilseeds	3001	\$79,662,437	\$9,754,363	\$318,982	\$10,149,777	\$3,528,535
Pesticides and other agricultural chemicals	3170	\$48,800,206	\$5,975,400	\$195,404	\$6,217,626	\$2,161,536
Wholesale services - Other nondurable goods merchant	3400	\$31,530,727	\$3,860,818	\$126,255	\$4,017,324	\$1,396,609
Nitrogenous fertilizer	3167	\$15,821,071	\$1,937,230	\$63,350	\$2,015,760	\$700,772
Refined petroleum products	3154	\$14,038,415	\$1,718,951	\$56,212	\$1,788,632	\$621,812
Phosphatic fertilizer	3168	\$11,698,679	\$1,432,459	\$46,844	\$1,490,527	\$518,176
All other crops	3010	\$8,801,864	\$1,077,755	\$35,244	\$1,121,444	\$389,866
Truck transportation services	3417	\$8,021,952	\$982,258	\$32,121	\$1,022,075	\$355,321
TOP 10 Subtotal Purchases	--	\$381,822,615	\$46,752,730	\$1,528,884	\$48,647,952	\$16,912,293

Table A.3.1.B. Input purchases for the oilseed farming sector (IMPLAN #1) ranked by total out of Mississippi (Non-MS) purchases by region in 2022 dollars.

Description	Code	Atlantic	South	Midwest	Plains	West	Total	Non-MS Total
TOTAL PURCHASES	--	\$17,049,052	\$955,859	\$100,830,649	\$22,139,187	\$255,375	\$746,672,634	\$280,285,278
Other real estate services	3447	\$3,009,854	\$168,748	\$17,800,729	\$3,908,471	\$45,084	\$131,818,222	\$49,481,801
Support activities for agriculture and forestry	3019	\$2,965,053	\$166,236	\$17,535,765	\$3,850,293	\$44,413	\$129,856,110	\$48,745,266
Oilseeds	3001	\$2,912,105	\$163,268	\$17,222,626	\$3,781,538	\$43,620	\$127,537,251	\$47,874,815
Pesticides and other agricultural chemicals	3170	\$1,783,919	\$100,016	\$10,550,364	\$2,316,523	\$26,721	\$78,127,715	\$29,327,509
Wholesale services - Other nondurable goods merchant	3400	\$1,152,623	\$64,622	\$6,816,788	\$1,496,749	\$17,265	\$50,479,779	\$18,949,053
