Don't underestimate the power of pink! The pink polka-dotted foliage of *Hypoestes Hippo*<sup>®</sup> Pink has provided color all season in our part-shade container trials. *Gomphrena Truffula*<sup>™</sup> Pink has shown non-stop flower production in full sun since planting in spring, and plants are not too tall, not too short, but just right in height for both landscape use and containers. *Scaevola Whirlwind*<sup>®</sup> Pink has bloomed and bloomed in full-sun container trials since spring planting, and has also done well in light shade. These three new selections from Proven Winners are performing admirably in our heat and humidity. They will be available as plants in garden centers starting in 2019.

*Vinca Mega Bloom Pink Halo*, an All-America Selections winner for 2017, thrives in the heat in our AAS Display Garden and is disease-resistant.

*Pentas Graffiti*<sup>®</sup> Pink (along with other colors in the Graffiti<sup>®</sup> series on the market from Benary) perform reliably well in the heat of summer and will provide a good flower display for us through the first warm weeks of fall.
