Trial Gardens and HortResearch at the South Mississippi Branch Experiment Station

Volume 6, Number 2

June 17, 2019

Published by Dr. Gene Blythe

Sunflowers from seed are easy for gardeners of all levels of experience and are always enjoyed by visitors to our trial gardens. Multiple crops planted from spring to fall provide a reliable display of flowers in colors ranging from yellow to orange to dark brown on plants from knee level to above eye level. Flowers may be cut for showy floral arrangements or simply enjoyed in the garden. Shown here are some of the varieties currently in flower in our gardens.

Sunray Yellow

Starburst Panache

Moulin Rouge

Shock o Lat

Copper Queen
